

QIK-PLUG 777 LED LIGHTS

Shaping the future of aerospace lighting for over 85 years

Honeywell Aerospace – a worldwide leader in the design, supply and support of exterior aircraft lighting systems. Honeywell offers this new forward and rear position Qik-Plug LED lights to replace existing halogen lamp PN LP64621 on aircrafts 737-700/-800/-900, 767-400, and 777-200/-300.

HONEYWELL LED LIGHTING LEADERSHIP

- Unparalleled Experience: 20 years of LED experience on the exterior of aircraft with over 3 billion LED flight hours
- Honeywell LED products undergo rigorous testing to ensure they meet advertised performance
- Based on proven experience meeting performance, quality, reliability and on time delivery commitments, Honeywell optimizes our LED applications in the areas of:
 - Optical design and control
 - Power management
 - Thermal management
 - Environmental protection

PRODUCT BENEFITS

- Plug-and-Play LED Upgrade
- Photometric life up to 50,000hrs.
- Lumen/candle power output and LED life are superior to competitors
- Reduces costs by: Reducing power consumption by 10% and increasing bulb life by 100x
- Long life allows 24/7 operations to help minimize damage
- Significantly reduces unscheduled maintenance events, improving aircraft availability
- Pay back approximately 1 Year with reduced power consumption and maintenance

PLUG AND PLAY

LED upgrade with no aircraft modifications

PHOTOMETRIC LIFE

Up to 50,000 hours

EFFICIENCY

Reducing power consumption by 10% and increasing bulb life by 100x

LESS MAINTENANCE

Significantly reduced maintenance, improves availability and reduces costs
