

MAINTENANCE SERVICE PLAN - AVIONICS. ADDITIONAL COVERAGE. ADDED BENEFITS.

Turn risks against unforeseen failures into a thing of the past by choosing our extended coverage to protect your Sky Connect products for helicopters.

Sky Connect is a reliable tracking system that delivers powerful management capabilities to enhance your helicopter operations. It enables mission optimization by providing access to real-time messaging, weather information, integrated flight planning – reducing downtime and increasing efficiency.

Fully aware of how all of these are crucial to you and the success of your operations, we are enhancing our existing MSP-Avionics program to include optional coverage for helicopter systems. This means that the Honeywell MSP-Avionics program will now expand its coverage scope by including Sky Connect products for helicopters.

When you choose our additional coverage, you can rest assured you are in good hands. Our program ensures that you are fully protected, mitigating the risks of unforeseeable failures and providing faster turnaround times for fixing the faults through timely replacements at a flight hour rate on top of your standard MSP fee.

As an MSP-Avionics customer, you'll also have peace of mind knowing you don't end up with a high unbudgeted cost. This way, you can rest assured that we and our network of authorized avionics service centers get you back in the air – fast.

KEY FEATURES

In addition to all the features of your standard MSP-Avionics coverage, you will also benefit from:

- Fixed price with an annual contract
- No-charge loaners
- 24/7 AOG emergency service
- Fully-transferable agreements
- Paid airfreight
- Factory-backed support, similar to your original factory warranty

MAIN BENEFITS

- Fixed budgeted costs by avoiding unplanned transactional costs
- Reduced downtime during AOG situations and faster turnaround replacement times ensure aircraft's higher dispatchability
- Reduced risk of unwarranted failures
